

Autism Awareness

Are you looking to increase awareness
of autism in your workplace?

Do you provide a service and want to better cater
for the needs of those on the autism spectrum?

We provide training delivered by a specialist
facilitator and experts by experience

Autism Training to suit your organisations' needs

We can deliver at a venue of your choice or for an additional fee we can accommodate training within our Sheffield based office if this is more convenient.

Whether you are looking at a one of training session or a series of training sessions we will work with you to identify the right package to suit your organisations' needs.

Brilliant course - gained lots of helpful knowledge that will benefit myself during my time at work.

Coppice School, Doncaster

Great to raise awareness and I will remember positive techniques when communicating with autistic students or external people I meet. Thank you!!!

Leeds College of Art

Very informative training course which I have really enjoyed. I felt it has enhanced my knowledge which will promote good practice in the future. Thank you.

Positive Pathways

This was the best training I have attended. Very informative.

Jobcentre Plus

Excellent training session. The trainer was very informative and passionate.

Remploy

General Autism Awareness training covers the following core elements:

- Intro to Autism Spectrum Conditions
- Intro to Asperger Syndrome
- History of ASC
- Legislation Overview
- Common Terms and Associated Conditions
- Triad of Impairments
- Dyad of Impairments
- Changes to the DSM

This session would typically last for around three hours and would be beneficial to those looking for a basic overview of autism and how to better understand the spectrum.

In addition to general autism awareness you can choose from one of our additional modules of choice, which can either be added to the general awareness package to create a full days training session or can be delivered stand alone.

If you have an organisational need that is not covered within our bespoke modules, please contact our team who will design a package to suit your needs.

For details of the modules available to choose from please see the table overleaf.
